

# FAN HEATER

## CH 7000 TURBO SERIES

- ➔ indoor applications
- ➔ floor and wall mounting

### DESCRIPTION:

Electric heaters with an innovative design in the family of convector heaters, stand out for their tapered and extremely compact line.

They are equipped with an adjustable thermostat that permits to pre-set the room temperature at the desired level

The TURBO version with its powerful and noiseless centrifugal fan allows quick and efficient heat diffusion in the room.

Moreover, the three levels of power allow to manage properly the energy saving, without sacrificing performance and high comfort level.

### MAIN FEATURES:

- Bivalent products suitable for floor and wall installation through a special support system.
- With daily mechanical programmer.
- Safety thermal device.
- 3 power rates:  
750W - 1250W - 2000W.
- 150 cm cable with Schuko plug.
